

Conception and creation of a five-finger text input device and its system of operation

1. Introduction
2. Research Question
3. Current technology – Keyboard Types
 - 3.1. Full Keyboards
 - 3.1.1.QWERTY
 - 3.1.2.Dvorjak-layout
 - 3.1.3.Mini QWERTY
 - 3.2. Chorded Keyboards
 - 3.2.1.Twiddler
 - 3.2.2.Microwriter
 - 3.2.3.Frog pad
 - 3.2.4.Chorded gloves
 - 3.3. Combinations
 - 3.3.1.Half QWERTY
4. Devising different Systems
5. System of Entry
 - 5.1. Repeated Button push-sequence
 - 5.2. Combinatory Systems
 - 5.2.1.'Pure' Combinations
 - 5.2.2.Combinations with Soft Key
 - 5.2.3.Permutations with sequence order important
6. System of Letter Placement
 - 6.1. Empirical evaluation on frequency
 - 6.2. Alphabetical order
 - 6.3. Standard keyboard layout
7. Determination of Physical Implementation
 - 7.1. Table-bound
 - 7.2. Handheld
8. Evaluation and Analysis of Learning and Usage
 - 8.1. Efficiency and Frequency of Mistakes
 - 8.1.1.For each combination of System of entry and letter Placement
 - 8.2. Comparison of Models
9. Improvements
 - 9.1. Visual Guide
10. Conclusion
